VOLUME CONTENTS

Number 1

A. A. Barhorst and L. J. Everett	1	Modeling hybrid parameter multiple body systems: a different approach
A. Mamedov	23	An inverse problem related to the determination of elastoplastic properties of a cylindrical bar
Liu Ren-huai and Cheng Zhen-qiang	33	On the non-linear buckling of circular shallow spherical sandwich shells under the action of uniform edge moments
L. T. Grujić	45	Exact solutions for asymptotic stability: non-linear systems
Y. Kobayashi and A. W. Leissa	57	Large amplitude free vibration of thick shallow shells supported by shear diaphragms
	67	Announcements

Number 2

V. T. Coppola and B. R. Miller	69	Synchronization of perturbed non-linear Hamiltonian oscillators
D. M. Haughton and A. Orr	81	On the eversion of incompressible elastic cylinders
Liu Ren-huai and Li Jun	97	Non-linear vibration of shallow conical sandwich shells
Ching S. Chang and Jian Gao	111	Non-linear dispersion of plane wave in granular media
Ü. Lepik	129	Elastic–plastic vibrations of a buckled beam
A. Paglietti and M. C. Porcu	141	Stress stability at the yield surface
N. K. Chandiramani, R. H. Plaut and L. I. Librescu	149	Non-linear flutter of a buckled shear-deformable composite panel in a high-supersonic flow
T. Angelov	169	A secant-modulus method for a rigid-plastic rolling problem
K. Szabelski and J. Warmiński	179	Parametric self-excited non-linear system vibrations analysis with inertial excitation

NLM 30-6-K

Number 3

X. Tong, B. Tabarrok and F. P. J. Rimrott	191	Chaotic motion of an asymmetric gyrostat in the gravitational field
A. A. Zevin	205	Existence and stability of forced oscillations in non-linear systems with one degree of freedom
C. Rogers, W. K. Schief and M. P. Stallybrass	223	Initial/boundary value problems and Darboux–Levi-type transformations associated with a 2 + 1-dimensional eigenfunction equation
H. Bellout and S. L. Wills	235	Perturbation of the domain and regularity of the solutions of the bipolar fluid flow equations in polygonal domains
R. Bandelli	263	Unsteady unidirectional flows of second grade fluids in domains with heated boundaries
C.-L. Lu and N. C. Perkins	271	Complex spatial equilibria of U-joint supported cables under torque, thrust and self-weight
G. Pontrelli	287	Flow of a fluid of second grade over a stretching sheet
H. S. Takhar, R. S. Agarwal, R. Bhargava and V. M. Soundalgekar	295	Flow of a micropolar fluid past a decelerating porous rotating disc
V. D. Sharma and Ch. Radha	305	Three dimensional shock wave propagation in an ideal gas
A. S. Wineman and W. K. Waldron Jr	323	Normal stress effects induced during circular shear of a compressible non-linear elastic cylinder
W. Altman and A. Marmo de Oliveira	341	Physics and anholonomic components of tensors of elasticity theory
V. Z. Lyandres and M. Shahaf	359	Envelope correlation function of the narrow-band non-Gaussian process
Shi-Jun Liao	371	An approximate solution technique not depending on small parameters: a special example
S. E. Jones	381	Further results on the construction of general solutions to some non-linear, second order, non-conservative systems
R. K. Bhatnagar, G. Gupta and K. R. Rajagopal	391	Flow of an Oldroyd-B fluid due to a stretching sheet in the presence of a free stream velocity

Number 4

M. Vasta	407	Exact stationary solution for a class of non-linear systems driven by a non-normal delta-correlated process
H. S. Costa Mattos, M. L. Martins-Costa and R. M. Saldanha da Gama	419	On the modelling of momentum and energy transfer in incompressible mixtures
R. M. Saldanha da Gama	433	An alternative mathematical modelling for coupled conduction/radiation energy transfer phenomenon in a system of N gray bodies surrounded by a vacuum
K. J. Lin and R. Y. Jou	449	Non-axisymmetric extrusion of viscous and viscoelastic liquids under gravity
A. Hasanov and Z. Seyidmamedov	465	The solution of an axisymmetric inverse elasto-plastic problem using penetration diagrams
H. A. Zedan	479	Group classification of a heterogeneous Schroedinger equation
J. P. Pascal and H. Pascal	487	On some non-linear shear flows of non-Newtonian fluids
H. Ohnabe	501	Non-linear vibration of heated orthotropic sandwich plates and shallow shells
S. Abu-Zaid and G. Ahmadi	509	A thermodynamically consistent rate-dependent model for turbulent two-phase flows
V. Coscia, A. Sequeira and J. Videman	531	Existence and uniqueness of classical solutions for a class of complexity-2 fluids
L. Tao	553	Representative volumes for a class of composite materials with periodic structures
X. Li and D. J. Steigmann	569	Point loads on a hemispherical elastic membrane
X. Li and D. J. Steigmann	583	Finite deformation of a pressurized toroidal membrane
D. E. Panayotounakos and M. Markakis	597	*Ad hoc* closed form solutions of the two-dimensional non-linear steady small perturbation equation in fluid mechanics
G. E. Falkovich, I. Ya. Shapiro and L. Shtilman	609	Two stages of decay turbulence of capillary waves

Number 5

R. Shailaja and M. J. Vedan	617	Inverse Scattering Transform (IST) analysis of KdV–Burgers' equation

Y. S. N. Reddy, C. M. Dakshina Moorthy and J. N. Reddy 629 Non-linear progressive failure analysis of laminated composite plates

Hui-Shen Shen and F. W. Williams 651 Postbuckling analysis of imperfect composite laminated plates on non-linear elastic foundations

A. Tumin 661 Three-wave non-linear interaction in a three-dimensional compressible boundary layer

M. Dimentberg, Z. Hou and M. Noori 673 Spectral density of a non-linear single-degree-of-freedom system's response to a white-noise random excitation: a unique case of an exact solution

M. Dimentberg, G. Q. Cai and Y. K. Lin 677 Application of quasi-conservative averaging to a non-linear system under non-white excitation

M. Massoudi and I. Christie 687 Effects of variable viscosity and viscous dissipation on the flow of a third grade fluid in a pipe

G. P. Galdi, M. Grobbelaar-Van Dalsen and N. Sauer 701 Existence and uniqueness of solutions of the equations of motion for a fluid of second grade with non-homogeneous boundary conditions

M. Emin Erdoğan 711 Unsteady viscous flow between eccentric rotating disks

J. S. Yang and R. C. Batra 719 Mixed variational principles in non-linear electroelasticity

N. K. Moshchuk, R. A. Ibrahim, R. Z. Khasminskii and P. L. Chow 727 Asymptotic expansion of ship capsizing in random sea waves—I. First-order approximation

N. K. Moshchuk, R. Z. Khasminskii, R. A. Ibrahim and P. L. Chow 741 Asymptotic expansion of ship capsizing in random sea waves—II. Second-order approximation

N. Rudraiah, M. Venkatachalappa and C. K. Subbaraya 759 Combined surface tension and buoyancy-driven convection in a rectangular open cavity in the presence of a magnetic field

Number 6

M. Ostoja-Starzewski 771 Wavefront propagation in a class of random microstructures—II. Non-linear elastic grains

B. D. Vujanovic 783 Conservation laws and reduction to quadratures of the generalized time-dependent Duffing equation

A. D. Lewis and R. M. Murray 793 Variational principles for constrained systems: theory and experiment

R. Bandelli and K. R. Rajagopal 817 Start-up flows of second grade fluids in domains with one finite dimension

J. S. Bendat, R. N. Coppolino and P. A. Palo 841 Identification of physical parameters with memory in non-linear systems

A. V. Porubov and A. M. Samsonov 861 Long non-linear strain waves in layered elastic half-space

M. Migliardo 879 Quasi-monochromatic wave modulation in anisotropic dielectric media

R. J. Tait and J. L. Zhong 887 Dynamic extension and twist of a non-linear elastic tube

S. Biwa 899 Critical stretch for formation of a cylindrical void in a compressible hyperelastic material

M. Lauster 915 Conservation laws in non-linear dissipative systems

I Volume Contents and Author Index for Vol. 30 (1995)
